Frontend

- React/Redux
- AlpineJS
- Js-in-CSS
- Tailwind CSS
- TypeScript

Backend

- Node.js
- SQL
- Express.js
- Firebase
- GraphQL

Collaboration

- Git
- JIRA
- Agile
- Lint
- Co-Active Trained

Etc.

- Cypress/Jest
- Storybook
- Unit Testing/TDD
- Continuous Integration

Education

MFA in Emergent Digital Practices: University of Denver, 2014
MS in Arts Technology: Illinois State University, 2011
BA in Studio Art: Knox College, 2008

Professional Experience

Independent Contractor, *Strive Media, LLC*

Aug 2021 - Oct 2023

- Refactored legacy JavaScript and jQuery to modern ES6
- Updated styling from Legacy SCSS to composable Tailwind
- Created reusable Laravel Blade components powered by Alpine JS for reactivity
- Led development portion of brand refresh through Github Projects

Software Engineer, *Otis, LLC*

Jan 2021 - May 2021

- Developed React Native views
- Ensured type safety of data with Typescript
- Guided a contractor's work with weekly meetings and tickets
- Followed TDD with unit tests and Storybook

Sr Frontend Engineer, *Nike*

Jun 2019 - Jan 2021

- Launched a rebuilt front end under Nike Adventure Club brand.
- Developed a composable design system using React and styled-components.
- Implemented a hooks-based architecture for accessing the front end data-store.
- Wrote components to consume API endpoints and display product data.
- Built CMS with Contentful to handle site updates without changes to production.

Full-Stack Developer, *EasyKicks*

Feb 2018 - Jun 2019

- Developed a web-app in React/Redux.
- Built reusable components for consistent design and rapid development.
- Augmented Node.js API based on shifting business needs.
- Collaborated cross-functionally on business solutions.

Philippe Moore, contd

Frontend Web Developer, 3PRIME

Jan 2017 - Mar 2018

- Crafted a specialized JavaScript cost calculation view tailored for an industrial manufacturing company, making financial insights more accessible and processes smoother.
- Shared the ins and outs of reactive JavaScript frameworks like Vue and React with my co-workers through engaging training sessions, fostering a collaborative and skillful team.
- Took care of our client sites like they were my own, ensuring top-notch performance and user experience by weaving together polished PHP, HTML, JavaScript, and CSS code.

Creative Technologist, Fjord/Chaotic Moon

Sep 2015 - Oct 2016

- Brought ideas to life through hands-on hardware and software prototyping, turning concepts into tangible and functional experiences.
- Designed interactive installations with a focus on creating memorable and engaging experiences, blending technology seamlessly into the user's environment.
- Built meaningful connections with clients through clear and empathetic communication, ensuring their vision was not just understood but brought to life.
- Wove compelling narratives with emerging technologies, making the abstract tangible and helping users see the relevance of a service/product/system in their own lives.

Developer, Adpearance

Sep 2014 - Aug 2015

- Cut my teeth maintaining legacy client websites in all manner of web technologies, including, but not limited to, Expression Engine, Drupal, Wordpress, PHP, HTML, CSS, JavaScript, etc.

Teacher/Developer/Site Leader, Myers Learning, LLC

Oct 2012 - Dec 2014

- Taught elementary school children the fundamentals of programming through Scratch, a visual programming language.
- Contributed to the company's website showcasing our teachers and curriculum to potential customers.
- Led the program at multiple schools, supervising another teacher.

Value Added Human Stuff

Outside of software engineering, I bake hearth-style sourdough breads, sing Baritone with the Portland-based choir *In Medio*, speak fluent French, and love hanging out with my 5-year old, partner, two dogs and two cats.
